N/A XL Style Manager for Microsoft
Excel is the best program that you can use
to make your excel works easier. It is able
to automatically create new styles and also
add your own colors, font, border and
pattern to your documents. XL Style
Manager for Microsoft Excel has a tree
view which can be used to organize your
existing and new styles. You can create,
edit and manage the styles which you have
been using. You can export your colors
and styles to a text file or to a ready to use
XML file.Q: How do I properly initialize a
shared pointer in a function? I have a
function that initializes an shared pointer
(inside a class) and gives it the initial value
of 0. Later on, in a different function, I am
expecting this same shared pointer to have
the value I initialized it with. However, the

second function is not recognizing that the pointer is initialized and is giving it the

What's New in the XL Style Manager?
